Cali, Colombia

Full Stack Developer and Systems Engineering Student

Full Stack Developer with technical training in Software Analysis and Development (ADSO) under a Bootcamp methodology at Talento Tech. Specialized in building scalable digital solutions using technologies such as JavaScript (Node.js), HTML5, CSS3 (Bootstrap), and database management with MySQL and MongoDB. Focused on optimizing the end-user experience and applying logical thinking to transform requirements into functional applications.

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript, Bootstrap, Responsive Design.
- **Backend:** Node.js, API REST, Express.js, CRUD.
- **Data Bases:** MySQL (Queries SQL), MongoDB, Data Modeling.
- **Tools & Methodologie:** Git, GitHub (Branch Management), WordPress, Agile Methodologies (Scrum).

Highlighted Technical Experience

Velocity Adventures | Full Stack Web Developer January 2026 – March 2026

- Developed an interactive platform for managing extreme sports expeditions, ensuring 100% mobile compatibility through responsive design and advanced animations.
- Implemented JavaScript logic for dynamic service filtering and shopping cart data persistence, optimizing the user flow.
- Integrated a REST API-based architecture for data consumption and managed MySQL databases, ensuring system data integrity.
- Collaborated in a professional environment using GitHub branch management, maintaining stable version control for production deployment.

Education

- **Systems Engineering |** UNICATOLICA **|** 2024 – Present.
- **Bootcamp:** Web Developer Full Stack **|** Talento Tech & Gobernacion del Valle **|** 2026.
- **Software Engineering and Logical Thinking Course |** Platzi **|** 2022 – 2024.

Lenguages and Additional Information

- **English:** B1 Level – Technical reading comprehension (specialized in software documentation).
- **Archievements:** Intensive development certification under industry standards (Talento Tech).
